GUDEPU AKSHITHA

Hyderabad, Telangana | 9391870294 | gudepuakshitha24@gmail.com | LinkedIn | GitHub

PROFILE

Computer Science undergraduate with hands-on experience in Java, Spring Boot, SQL, REST APIs, and Full Stack (MERN) development through internships and academic projects. Skilled in designing backend applications, developing RESTful APIs, and building scalable web solutions. Passionate about software engineering, problem-solving, and continuously learning modern technologies to develop efficient, real-world applications.

EDUCATION

Sri Chaitanya Mahila Kalasala, Hyderabad – 92.8 % — July 2022 – July2024

Anurag University, Telangana – GPA: 8.04/10 — Aug 2024 – May 2028

Bachelor of Technology – Computer Science and Engineering

TECHNICAL SKILLS

Programming: Java, Python, SQL
Core Concepts: OOP, Exception Handling
Frameworks: Spring Boot, Hibernate
Databases: MySQL
Backend: CRUD Operations
Tools & Technologies: Maven, Git, GitHub

INTERNSHIPS

Smart Bridge
Apr 2025 – Jul 2025 Full Stack Development (MERN) Intern | Virtual

- Completed hands-on training in Full Stack MERN Development, building responsive web applications using MongoDB, Express.js, React.js, and Node.js. Worked on practical assignments, quizzes, and project-based learning covering frontend, backend, database integration, and REST API development.
- Technologies: MongoDB, Express.js, React.js, Node.js, JavaScript, HTML5, CSS3, REST APIs, Git, GitHub, VS Code.

SELECTED PROJECTS

Stock Trader: A Secure Web-Based Stock Trading Application Using the MERN Stack

- Developed a secure full-stack stock trading platform using MongoDB, Express.js, React.js, and Node.js**,** enabling users to register, authenticate with JWT**,** buy and sell stocks, manage investment portfolios, and track transaction history through a responsive web interface.
- Designed RESTful APIs for seamless frontend-backend communication and implemented role-based authentication, secure transaction processing, portfolio management, and an administrator dashboard for managing users, stocks, and trading activities.

Terminal-Based Two-Player Chess Game Using Core Java & DSA

- Developed a two-player terminal-based Chess application using Core Java, applying Object-Oriented Programming concepts including inheritance, polymorphism, method overloading/overriding, static members, and nested classes to implement chess pieces and game logic.
- Implemented the chessboard using a 2D array**,** move validation with structured algorithms, undo functionality using stacks, and move history using tree data structures**,** providing scalable architecture for future enhancements such as GUI, LAN multiplayer, AI-assisted gameplay, and voice commands.

ACHIEVEMENTS & CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional – Oracle University	**Oct 2025**
Programming in Java – NPTEL (IIT Kharagpur)	**Oct 2025**
Get Started with Microsoft Copilot – Microsoft	**Sep 2025**
Fundamental Algorithms: Design and Analysis – NPTEL (IIT Kharagpur)	**Feb 2026**
Introduction to Cloud – IBM SkillsBuild	**Oct 2024**
