CAREER OBJECTIVES

I am a second-year B.Tech student specializing in Artificial Intelligence with knowledge of Data Structures in C and Python, basic of Java, and Machine Learning concepts. I am interested in applying my programming and problem-solving skills to real-world projects while continuously learning new technologies and contributing to innovative solution.

EDUCATION

Bachelor of Technology (B.Tech) -Artificial Intelligence 2024 – 2028
Anurag University, Hyderabad **CGPA - 8.83**
Intermediate-MPC 2022 – 2024
Sri Chaitanya Junior College, Hyderabad **CGPA - 9.56**
School-SSC 2021 – 2022
DE Paul High School, Kurnool **CGPA - 10**

TECHNICAL SKILLS

- **Programming Languages:** C, Python, Java (Basic)
- **Core Concepts**: Data Structures and Algorithms
- **Database**: SQL
- **AI & Data Science:** Machine Learning, Artificial Intelligence
- **Python Libraries:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn
- **Framework:** Streamlit
- **Tools:** Visual Studio Code, Jupyter Notebook, Google Colab, MS Excel, MS Office

ACADEMIC PROJECT

1. 25 puzzle game using Python with GUI (Artificial Intelligence)

Technologies: Python, Tkinter

- Developed a 25 puzzle game using Python with a graphical user interface.
- Implemented the A * search algorithm to efficiently solve the puzzle.
- Designed an interactive GUI using Tkinter for user interaction.

2. Pothole Detection System using Machine Learning

Technologies: Python, Machine Learning, CNN, OpenCV, TensorFlow, Streamlit

- Developed a machine learning model to detect potholes from road images.
- Used image processing and ML techniques for pothole identification.
- Built a simple interface to analyze and display pothole detection results.

CERTIFICATES & COURSES

1. Machine Learning Using Python – SkillUP
2. C Programming (Basic)– HackerRank
3. GenAI Workshop – LyntraData
4. Database Management Systems – NPTEL [In progress]
